

**Club Scientists (Dancing to contemporary pixels and beats)  
Scheinwerfer (CHE) & Steve Gibson (CAN)**

The Swiss VJ group Scheinwerfer Scheinwerfer has been creating visual experiences at various electronic music and club events since 2001. Their live-composited and sound-driven visuals are designed to emphasise the theme of the event as well as taking into account the architectural framework of the performance space. Not coincidentally, Singapore's Centro Club has labelled us as "Club Scientists": Also, their performances are deeply influenced by the momentary state of their innovative "Soundium" software platform, which makes the impossible in interactive visuals possible. They are being joined by the famed Canadian Keyboardists and Lapter Steve Gibson, who they have been working with since 2006.

**Scheinwerfer** has performed at some of the coolest locations around the globe, supporting world-class DJs and musicians like Steve Gibson, Jeff Mills, Rush, Miss Kittin, Dave Clarke, Josh Wink and many more. Currently, the project focuses on the creation of interactive virtual multimedia environments and their integration in the physical world.
